

# Lab 4

Write a program to input two numbers and display their sum, difference, product, and quotient.

| main.c                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Run | Output                                                                                                                                          |
